# WHO WE ARE

Founded in 2005, Voltalia is an international player in renewable energy generation and storage, acting both as Power Producer and Service Provider for its Clients.

With a historic purpose to *"Improve global environment, fostering local development"*, Voltalia has officially become a "Mission-Driven" company in 2021 to enhance its environmental and social commitments.

## KEY FIGURES\*

**1.6 GW**

installed capacity

**500+ MW**

assets developed  
and sold by Voltalia

**2.6 GW**

constructed or  
in construction

**4.4 GW**

of assets under management  
for Voltalia and 3rd parties

\*as of 31/12/2022

## OUR PRESENCE

## A FULLY INTEGRATED SUSTAINABLE BUSINESS MODEL

## WHY CHOOSE VOLTALIA?

**Voltalia offers bespoke and turnkey solutions to power businesses and industries with renewable electricity from dedicated plants.**

We develop projects adapted to your needs, providing a **solid investment capacity** to finance them and renowned expertise in engineering, construction, operation and maintenance. This **enables your company to stay focused on its core business**.

The power plants can be located either **directly on the consumption site** or in a **remote location**, depending on the regulations. Our business model is flexible and we have dedicated teams who can design and implement a large range of solutions for procurement of renewable energy, including **Power Purchase Agreements (PPAs)** and other innovative mechanisms aligned with market regulations and best practices.

## HOW WILL YOUR BUSINESS BENEFIT ?

### \$ AFFORDABILITY & PREDICTABILITY

- A **competitive energy tariff** is secured on the **long-term** and provides security against grid tariff or market price fluctuations
- **No upfront CAPEX** investment is required from your company and

### ⚡ RELIABILITY & SECURITY

- Where the grid supply is unreliable, **on-site generation** improves security of power supply
- A customized, **hybrid solution** can be implemented to match your consumption profile

### ♻️ SUSTAINABILITY & ADDITIONALITY

- Sourcing renewable electricity helps your company comply with **voluntary or compulsory sustainability and CO2 emissions reduction targets**
- When procuring electricity from a new power plant, your company contributes to **adding renewable capacity** to the grid

### 👥 LEADERSHIP & BRANDING

- Direct sourcing of renewable energy provides your business with a real **competitive advantage**
- **Brand recognition** and leadership for sustainability achievements are added benefits

# OUR SOLUTIONS CAN POWER YOUR BUSINESS

## **METALS AND MINERALS**

- Mining • Steel & Smelting
- Metal Processing

## **CONSUMER GOODS**

- Automobile • Textiles
- Cosmetics & Care
- Pharmaceuticals

## **FINANCIAL SERVICES**

- Banks • Insurance companies

## **HEAVY INDUSTRIES**

- Pulp & Paper • Chemicals & Plastics
- Cement, Ceramics & Glass

## **TECHNOLOGY**

- Data Centers
- Telecommunications

## **PUBLIC SERVICES**

- Administrations • Hospitals
- Schools & Universities
- Municipalities

## **AGRO INDUSTRY**

- Agriculture • Meat, Fish & Dairy
- Food Processing
- Beverages & Breweries

## **INFRASTRUCTURES**

- Seaports & Airports
- Water Treatment & Desalination
- Public Transportation

## **ENTERTAINMENT**

- Hotels & Resorts
- Stores & Shopping Malls

## OUR REFERENCES

**We have signed Power Purchase Agreements with major power consumers in countries where we operate.**

These agreements will provide clean electricity to our Clients from dedicated renewable power plants.

Voltaia is a leader on the PPA market.
