

Embrace Sustainability with  
**Voltalia PV  
Secondhand Activity**

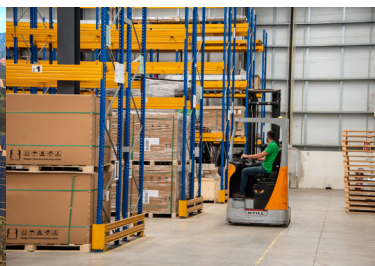

**At Voltalia, we are committed to building a sustainable future. Through our repair services and refurbished equipment, we contribute to minimizing waste and maximizing the efficiency of PV renewable energy systems. Join us in making a positive impact and embracing sustainability.**

### **Repair services**

Count on Voltalia and our extensive network of partners for exceptional repair services. Our skilled technicians specialize in restoring string inverters and central inverter parts, ensuring that your photovoltaic systems operate at their optimal performance. We offer timely solutions to minimize downtime and maximize energy production.

### **Refurbished Equipment**

Discover our wide selection of quality refurbished inverter parts and string inverters. By choosing our refurbished equipment, you not only benefit from cost savings but also contribute to reducing electronic waste. Each refurbished item undergoes meticulous testing, guaranteeing its reliability and compatibility with your existing installations.

# Together Towards a Sustainable Future

## Long-Term Agreements

Partner with Voltalia for comprehensive long-term agreements. We provide preventive and corrective maintenance, as well as a reliable supply of spare parts, ensuring the continuous performance and longevity of your inverters. With our expertise and commitment, you can rely on us to support your photovoltaic systems throughout their lifecycle.

## Purchase of Old Equipment

At Voltalia, we offer an environmentally responsible solution for the disposal of old equipment. We purchase both inverters and solar panels, enabling you to upgrade your installations while minimizing waste. Our focus is on giving a second life to old equipment, and you can trust us to handle the proper disposal in an environmentally friendly manner.

## Contact Us

To learn more about our repair services, quality refurbished equipment, long-term agreements, and responsible equipment disposal, reach out to us today.
